SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Commercial name: Methylhexahydrophthalic anhydride
REACH registration number: 01-2119510879-29-0000
Index number: 607-241-00-6
International Chemical Identification: hexahydro-4-methylphthalic anhydride
CAS number: 19438-60-9
EC number: 243-072-0

1.2. Relevant identified uses of the substance or mixture and uses advised against

Formulation
Industrial use as a hardener for epoxy resins, as such or in a mixture

1.3. Details of the supplier of the safety data sheet

Producer: Polynt S.p.A.
Via Enrico Fermi 51
24020 Scanzorosciate (BG)
ITALY
Telephone number: +39 035 652 111
mds@polynt.com

Supplier: Polynt S.p.A.
Via Enrico Fermi 51
24020 Scanzorosciate (BG)
ITALY
Telephone number: +39 035 652 111

1.4. Emergency telephone number

+39 035 652 276

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Reg CE 1272/2008

(*) 2.2. Label elements

Labelling according to Regulation 1272/2008/EC.

Contains: hexahydro-4-methylphthalic anhydride
INDEX N° 607-241-00-6
CAS N° 19438-60-9
EC N° 243-072-0

Pictograms:
DANGER

Hazard statement:

H317: May cause an allergic skin reaction.
H318: Causes serious eye damage.
H334: May cause allergy or asthma symptoms or breathing difficulties if inhaled.

Precautionary statements:

P272: Contaminated work clothing should not be allowed out of the workplace.
P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P501: Dispose of contents/container to waste in accordance with national/international regulation.
P261: Avoid breathing vapours.
P333+P313: If skin irritation or rash occurs: Get medical advice/attention.
P284: (In case of inadequate ventilation) wear respiratory protection. (see MSDS).
P304+P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P280: Wear protective gloves/eye protection/face protection. (see MSDS).
P302+P352: IF ON SKIN: Wash with plenty of soap and water.
P362+P364: Take off contaminated clothing and wash it before reuse.
P341+P311: If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician.

2.3. Other hazards

No other known. For PBT and/or vPvB see section 12.5.

SECTION 3: Composition/information on ingredients

3.1. Substances

Hexahydro-4-methylphthalic anhydride

International Chemical Identification: hexahydro-4-methylphthalic anhydride
Index number: 607-241-00-6

Chemical formula: C9H12O3
Concentration range: > 99 %
REACH registration number: 01-2119510879-29-0000
CAS number: 19438-60-9
EC number: 243-072-0

SECTION 4: First aid measures

(*)4.1. Description of first aid measures

Inhalation:
Remove to fresh air. If breathing is irregular or stopped, administer artificial respiration. If symptoms persist, call a physician.

Skin:
After contact with skin, wash immediately with plenty of soap and water. Consult a physician.
Eye:
In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice. Call a physician immediately.

Ingestion:
Call a physician immediately. Clean mouth with water. Do not induce vomiting without medical advice. Never give anything by mouth to an unconscious person.

4.2. Most important symptoms and effects, both acute and delayed

There is no data available for this product.

4.3. Indication of any immediate medical attention and special treatment needed

See section 4.1.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Appropriate fire-fighting equipment:
Foam, carbon dioxide (CO2), powder, water spray.

Inappropriate fire-fighting equipment:
Do not use water jets as they can disperse and spread fire.

5.2. Special hazards arising from the substance or mixture

In combustion emits toxic fumes of carbon dioxide / carbon monoxide.

5.3. Advice for firefighters

In the event of fire, wear self-contained breathing apparatus. Water mist may be used to cool closed containers. Use personal protective equipment to protect skin/eyes.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Move any people not authorised to contain the emergency out of the area. Avoid coming in contact with the substance or handling containers without adequate protection. Use the personal protective equipment described in section 8. Use a respirator in the event of emissions/spillage of large quantities. Eliminate all sources of ignition. Remove all incompatible materials as outlined in section 10.5 of SDS.

6.2. Environmental precautions

Contain the spillage as far as possible. Prevent spilled materials getting into the drainage system, wells, surface water or groundwater. In the case of leaks into a water course, drains, or if the product has contaminated the ground or vegetation, contact the local authorities.

6.3. Methods and material for containment and cleaning up

Do not use equipment that can generate sources of ignition when cleaning. If possible, vacuum up the spilled material and/or absorb parts that can’t be vacuumed up with inert materials (sand, earth, absorbent materials…) and place in suitable containers (separate liquids and solids) for disposal in accordance with section 13. After collection, ventilate and clean the affected area with water before granting access. Do not flush the water used for cleaning into watercourses or down drains.

6.4. Reference to other sections
See sections 8 and 13.

SECTION 7: Handling and storage

(*)7.1. Precautions for safe handling

**Recommendations for safe use:**
Provide sufficient air exchange and/or exhaust in work rooms.
Avoid contact with skin and eyes.
Avoid breathing vapours.

**Advice on general occupational hygiene:**
Do not eat, drink or smoke when using this product.
Wash hands thoroughly after handling.
Take off contaminated clothing and wash it before reuse.
Contaminated work clothing should not be allowed out of the workplace.

7.2. Conditions for safe storage, including any incompatibilities

Eliminate all sources of combustion.
Keep container hermetically closed in a dry and well ventilated environment.
Do not store near heat sources or expose to direct sunlight, to preserve the quality of the product.
Keep away from incompatible materials (see point 10.5).
Keep away from food, feed and beverages.

7.3. Specific end use(s)

None identified.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

**DERIVED NO EFFECT LEVEL (DNEL) / DERIVED MINIMUM EFFECT LEVEL (DMEL)**

**Workers:**

**Long term systemic effects:**
Inhalation: DNEL 79.3 mg/m³ Assessment factor 5
Dermal: DNEL 90 mg/kg bw/day Assessment factor 5

**General population:**

**Long term systemic effects:**
Inhalation: DNEL 19.6 mg/m³ Assessment factor 10
Dermal: DNEL 45 mg/kg bw/day Assessment factor 10
Oral: DNEL 45 mg/kg bw/day Assessment factor 10

**PREDICTED No EFFECT CONCENTRATION (PNEC)**

**Environment:**

**Water:**
PNEC water (freshwater): 0.1 mg/l Assessment factor 1000
PNEC water (marine water): 0.01 mg/l Assessment factor 10000
PNEC water (intermittent releases): 1 mg/l Assessment factor 100

**Sediment:**
PNEC sediment (freshwater): 1.64 mg/kg sediment dw
PNEC sediment (marine water): 0.164 mg/kg sediment dw

**Soil:**
PNEC soil: 0.2685 mg/kg soil dw

**STP:**
PNEC STP: 2.19 mg/l Assessment factor 100

Occupational Exposure limit values: Data not available

8.2. Exposure controls

Appropriate engineering controls:
See annexe of this file.

Eye / face protection:
Goggles or protective visor.

Skin protection / of the Hand:
The material the gloves are made of must be impermeable and stable when in contact with the substance. No specific information available on the suitability of the material and thickness of the gloves. Consult the glove manufacturer for specific information on the suitability of the gloves. Replace the gloves in the case of internal contamination, when punctured, or if external contamination cannot be removed. The actual duration of protection depends on the conditions of use.

Skin protection / of the body:
Wear protective clothing resistant to chemical substances.

Respiratory protection:
Mask with A type filter for vapours and organic gases with a boiling point >65°C. (EN 149)

Environmental exposure controls:
See annexe of this file.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

a1) Appearance: Liquid

a2) Color: Colourless

b) Odour: Characteristics

c) Odour threshold: NOT AVAILABLE

d) pKₐ: NOT APPLICABLE  (pKₐ1=4.2 pKₐ2=6.6 @20°C)

e2) Freezing point: -61.5 °C

f1) Initial boiling point: 295.5 °C

g) Flash point: 159.8 °C CC

h) Evaporation rate: NOT AVAILABLE

i) Flammability (solid, gas): NOT APPLICABLE

j1) Upper flammability limits: NOT AVAILABLE

j2) Lower flammability limits: NOT AVAILABLE

j3) Upper explosive limits: NOT AVAILABLE
j4) Lower explosive limits: NOT AVAILABLE

k) Vapour pressure: 0.33 Pa @ 25°C

l) Vapour density: NOT AVAILABLE

m) Relative density: 1.151 @ 20°C

n) Water solubility: 8.4 g/l @ 20°C (as acid form)

o) Partition coefficient: n-octanol/water: 2.09 @ 40°C

p) Auto-ignition temperature: 430 °C @ 998.3 hPa

q) Decomposition temperature: NOT AVAILABLE

r) Viscosity: 101.4 mPa.s @ 20°C

   NOT EXPLOSIVE
   NOT OXIDIZING

9.2. Other information

   Not any.

SECTION 10: Stability and reactivity

10.1. Reactivity

   Stable under normal conditions.

10.2. Chemical stability

   Stable under normal conditions.

10.3. Possibility of hazardous reactions

   None known in normal conditions.

10.4. Conditions to avoid

   Avoid exposure to heat sources.

10.5. Incompatible materials

   Strong acids, strong bases, oxidizing agents.

10.6. Hazardous decomposition products

   Unknown

SECTION 11: Toxicological information

11.1. Information on toxicological effects

   Acute toxicity:
Oral:
Method:
EU Method B.1 tris (Acute Oral Toxicity - Acute Toxic Class Method)
OECD Guideline 423 (Acute Oral toxicity - Acute Toxic Class Method)
rat (Sprague-Dawley) female; oral: gavage
Results:
LD50: > 2000 mg/kg bw (female) based on: test mat.

Dermal:
Method:
Read-across from supporting substance (structural analogue or surrogate)
OECD Guideline 402 (Acute Dermal Toxicity) (1981);
EU Method B.3 (Acute Toxicity (Dermal)(84/449/EEC)
rat (Sprague-Dawley); male/female; semiocclusivo
Results:
LD50: > 2000 mg/kg bw (male/female)

Skin corrosion/irritation:
Method:
FHSA - 16CFR1500.41; rabbit (Albino) Coverage: occlusive(shaved)
Results: moderately irritating

Serious eye damage/eye irritation:
Results: Irritating

Respiratory or skin sensitisation:

Respiratory Sensitisation:
Results:
Sensitising Category 1

Skin Sensitisation:
Results:
Sensitising Category 1

Germ cell mutagenicity:

In Vitro:
bacterial reverse mutation assay (e.g. Ames test) (gene mutation)
Method:
OECD Guideline 471 (Bacterial Reverse Mutation Assay)
EU Method B.13/14 (Mutagenicity - Reverse Mutation Test Using Bacteria)
S. typhimurium TA 1535, TA 1537, TA 98 and TA 100 (met. act.: with and without)
E. coli WP2 uvr A (met. act.: with and without)
Results: negative

mammalian cell gene mutation assay (gene mutation) mouse lymphoma L5178Y cells:
Method:
EU Method B.17 (Mutagenicity - In Vitro Mammalian Cell Gene Mutation Test)
OECD Guideline 476 (In vitro Mammalian Cell Gene Mutation Test)
mammalian cell gene mutation assay (gene mutation)
mouse lymphoma L5178Y cells(met. act.: with and without)
Results: negative

mammalian chromosome aberration test (chromosome aberration) lymphocytes: human:
Method:
EU Method B.10 (Mutagenicity - In Vitro Mammalian Chromosome Aberration Test)
OECD Guideline 473 (In vitro Mammalian Chromosome Aberration Test)
in vitro mammalian chromosome aberration test (chromosome aberration)
lymphocytes: human (met. act.: with and without)
Results: negative

In Vivo: Data Not available

Carcinogenicity: Not available

Reproductive toxicity:
Effects on sexual function and fertility:

Method:
OECD Guideline 421 (Reproduction / Developmental Toxicity Screening Test)
rat (Sprague-Dawley) male/female; screening oral: gavage

Results:
NOAEL (P): 450 mg/kg bw/day (actual dose received)
(male/female) based on: test mat.
NOAEL (f1): 450 mg/kg bw/day (actual dose received)
(male/female) based on: test mat.
Conclusions: not classified

Aspiration hazard: Not available

Specific target organ toxicity (STOT) - Single exposure:
Not available

Specific target organ toxicity (STOT) - Repeated exposure:

Oral:
Method:
OECD Guideline 407 (Repeated Dose 28-Day Oral Toxicity in Rodents)
EU Method B.7 (Repeated Dose (28 Days) Toxicity (Oral))
rat (Sprague-Dawley) male/female, subacute (oral: gavage)

Results:
NOAEL: 450 mg/kg bw/day (nominal) (male/female) based on: test mat.
(Macroscopic/microscopic pathology of the stomach)
NOEL: 50 mg/kg bw/day (nominal) (male/female) based on: test mat.
(Macroscopic/microscopic pathology of the stomach)
Conclusions: not classified

SECTION 12: Ecological information

12.1. Toxicity

Toxicity to aquatic environment:

Short-term toxicity to the aquatic environment:

Fish:
Method:
EU Method C.1 (Acute Toxicity for Fish)
OECD Guideline 203 (Fish, Acute Toxicity Test)
Gnathostomus aculeatus freshwater static

Results:
LC50 (24 h): > 100 mg/L test mat. (nominal)
LC50 (48 h): > 100 mg/L test mat. (nominal)
LC50 (72 h): > 100 mg/L test mat. (nominal)
LC50 (96 h): > 100 mg/L test mat. (nominal)

Aquatic invertebrates:
Method:
EU Method C.2 (Acute Toxicity for Daphnia)
OECD Guideline 202 (Daphnia sp. Acute Immobilisation Test)
Daphnia magna freshwater static

Results:
EC50 (24 h): > 100 mg/L test mat. (nominal) based on: mobility
EC50 (48 h): > 100 mg/L test mat. (nominal) based on: mobility

Algae or other aquatic plants:
Method:
EU Method C.3 (Algal Inhibition test)
OECD Guideline 201 (Alga, Growth Inhibition Test)
Pseudokirchneriella subcapitata (algae) freshwater static

Results:
EC50 (72 h): 135 test mat. (nominal) based on: growthrate
EC50 (72 h): 81.3 test mat. (nominal) based on: biomass
NOEC (72 h): 32 mg/L test mat. (nominal) based on: growth rate
NOEC (72 h): 32 test mat. (nominal) based on: biomass
LOEC (72 h): 100 test mat. (nominal) based on: growth rate
LOEC (72 h): 100 test mat. (nominal) based on: biomass
EC10 (72 h): 77.5 test mat. (nominal) based on: growth rate
EC10 (72 h): 42 test mat. (nominal) based on: biomass
EC20 (72 h): 29.7 test mat. (nominal) based on: growth rate
EC20 (72 h): 57.3 test mat. (nominal) based on: biomass

Aquatic microorganisms:
Method:
EU Method C.11 (Biodegradation: Activated Sludge Respiration Inhibition Test)
OECD Guideline 209 (Activated Sludge, Respiration Inhibition Test)
activated sludge, domestic freshwater static
Results:
EC50 (3 h): 218.8 mg/L test mat. (nominal) based on: respiration rate

Long-term toxicity to aquatic environment: Data not available
Toxicity to the Terrestrial environment: Data not available

12.2. Persistence and degradability

Degradability:

Abiotic degradation:

Hydrolysis:
Method:
EU Method C.7 (Degradation: Abiotic Degradation: Hydrolysis as a Function of pH)
OECD Guideline 111 (Hydrolysis as a Function of pH)
Results:
Half-life (DT50): t1/2 (pH 4): 1.43 min at 20 °C; Rate constant
t1/2 (pH 4): 2.04 min at 30 °C; Rate constant:
t1/2 (pH 4): 0.692 min at 50 °C; Rate constant:
t1/2 (pH 7): 1.9 min at 20 °C; Rate constant:
t1/2 (pH 7): 1.26 min at 30 °C; Rate constant:
t1/2 (pH 7): 0.327 min at 50 °C; Rate constant:
t1/2 (pH 9): 1.27 min at 20 °C; Rate constant:
t1/2 (pH 9): 1.18 min at 30 °C; Rate constant:
t1/2 (pH 9): 0.233 min at 50 °C; Rate constant:
Value used for CSA: 1.9 min at 20 °C = 3.6 min at 12 °C

Phototransformation in air:
Method:
EPWIN (v 4.0), AOPWIN Program (v 1.92) PHOTOCHEMICAL REACTION WITH OH RADICALS
Results:
Half-life (DT50): 45.268 h (24-hour day; 0.5E6 OH/cm3)
Value used for CSA: Half-life in air: 45.268 h

Biotic degradation:

Aquatic environment:
Method:
EU Method C.4-D (Determination of the 'Ready' Biodegradability - Manometric Respirometry Test).
OECD Guideline 301 F (Ready Biodegradability: Manometric Respirometry Test)
Test type: ready biodegradability activated sludge, non-adapted
Results:
under test conditions no biodegradation observed % Degradation of test substance: ca. 2 after 28 d (O2 consumption)
Value used for CSA: Not ready biodegradable

Conclusions: The substance is hydrolysed rapidly in a few minutes; therefore exposure of the aquatic and terrestrial compartments for this substance are unlikely.

12.3. Bioaccumulative potential

Bioaccumulation:

Aquatic environment:
Method:
US EPA EPIWIN (v 4.0)

Results:
BCF: 11.12 L/kg
LogBCF: 1.05

Value used for CSA: BCF: 11.12 L/kg ww (L/kg ww or dimensionless)

Terrestrial environment: Data not available

Conclusions: These data indicate that the substance is not bioaccumulative (R).

12.4. Mobility in soil

Adsorption/desorption:
Method: Calculation method US EPA EPIWIN (v 4.0); Study type: adsorption/desorption.
Results:
Adsorption coefficient: Koc = 41.94; LogKoc = 1.62

Value used for CSA: Koc = 41.94; LogKoc = 1.62 at 20 °C

Volatilisation:
Method: EPIWIN (v 4.0), HENRYWIN Program (v 3.20)
Results:
Henry’s Law constant: 2.9 Pa m3/mol at 25 °C

Distribution among environmental compartments:
Method: Calculation programme: EPIWIN (v.4.0).
Calculation according to Mackay, Level III
Media: air - biota - sediment(s) - soil - water;
Results:
Percent distribution in media:
Air (%) = 4.79
Water (%) = 39.1
Soil (%) = 56
Sediment (%) = 0.008

12.5. Results of PBT and vPvB assessment

Regarding all available data on biotic and abiotic degradation, bioaccumulation and toxicity it can be stated that the substance does not fulfil the PBT criteria (not PBT) and not the vPvB criteria (not vPvB).

12.6. Other adverse effects

No other known.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Recycle if possible, or send to an authorized incinerator. Follow the instructions in sections 6 and 7 when handling waste spillages, taking the steps indicated in the same sections. We recommend recycling containers instead of disposal. Observe the local and national legislation in force.

SECTION 14: Transport information

14.1. UN number

NOT APPLICABLE

14.2. UN proper shipping name

NOT APPLICABLE
14.3. Transport hazard class(es)

NOT APPLICABLE

14.4. Packing group

NOT APPLICABLE

14.5. Environmental hazards

NOT APPLICABLE

14.6. Special precautions for user

NOT APPLICABLE

ADR/RID
- Tunnel restriction code: NOT APPLICABLE
- Category - limited quantities per transport unit: NOT APPLICABLE
- LQ code - limited quantities per pack unit: NOT APPLICABLE
- E code excepted quantities: NOT APPLICABLE

IMDG
- LQ code - limited quantities per pack unit: NOT APPLICABLE
- E code excepted quantities: NOT APPLICABLE
- Ems: NOT APPLICABLE

ICAO/IATA
- Packing Instructions / max. net quantities per package per plane - combi and cargo: NOT APPLICABLE
- Packing Instructions / max. net quantities per package in limited quantity regime: NOT APPLICABLE
- EQ code for excepted quantities regime: NOT APPLICABLE

14.7. Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code

NOT APPLICABLE

SECTION 15: Regulatory information

(*)15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

European Regulation 1907/2006/EC (Reach);
European Regulation 1272/2008/EC (CLP);
European Regulation 453/2010/EU;
DIRECTIVE 24/1998/EC;
DIRECTIVE 37/2004/EC;
DIRECTIVE 92/1999/EC;
DIRECTIVE 18/2012/EU;

Methylhexahydrophthalic anhydride (CAS 19438-60-9) is listed in the Candidate List
(list of SVHC substances) published by ECHA on 19 December 2012.
It meets the criteria of Article 57 (f) of REACH because it is a substance
with respiratory sensitising properties, for which there is scientific
evidence of probable serious effects to human health which give rise to an
equivalent level of concern to those of other substances listed in
points (a) to (e) of Article 57 of REACH.
Companies may have legal obligations resulting from the inclusion of substances
in the Candidate List.
These obligations refer not only to the listed substances on their own or in
mixtures but also to their presence in articles.
For further information see:
http://echa.europa.eu/it/candidate-list-obligations

15.2. Chemical safety assessment

CSA available.
 SECTION 16: Other information

Safety Data Sheet compiled according to Regulation 453/2010/EU.

Exposure Scenarios in local languages will be published as soon as they are available.

(*) on the left indicate the modifications with respect to the last version.

### Risk Management Measures (RMM)

**Risk Caracterisation Ratio (RCR) (*2):**
- Environmental: water | Freshwater: 0.0106
- Environmental: sediment | Freshwater sediments: 0.16 mg/kg

### Operating conditions

**Local exhaust ventilation is installed (98% emission reduction).** Present formation of aerosols. Keep equipment lightly closed in a cool and dry place. Store away from foodstuffs, alkali and water.

### Risk Management Measures (RMM)

**Operating conditions:**
- Local exhaust ventilation is installed (98% emission reduction).
- Present formation of aerosols. Keep equipment lightly closed in a cool and dry place. Store away from foodstuffs, alkali and water.
- All personnel are trained.

---

**Risk Characterisation Ratio (RCR) (*2):**
- Freshwater: 0.0106
- Marine water: 0.0109
- Freshwater sediments: 0.16 mg/kg

---

**Critical physical parameters:**
- Solubility: 8400 mg/L; flammability: not highly flammable; corrosivity: not corrosive

---

**Reference:**
- Methods for the determination of effects of chemicals on species arising from atmospheric contamination have not yet been fully developed, except for inhalation studies with mammals. Therefore, the methodology used for hazard assessment (and subsequently the risk characterization) of chemicals in water and soil is applicable. A worst-case, only long term systemic exposures were considered. Thus, the derived RCRs represent worst-case scenarios.

---

**Note:**
- *1: method for the determination of effects of chemicals on species arising from atmospheric contamination have not yet been fully developed, except for inhalation studies with mammals. Therefore, the methodology used for hazard assessment (and subsequently the risk characterization) of chemicals in water and soil is applicable. A worst-case, only long term systemic exposures were considered. Thus, the derived RCRs represent worst-case scenarios.
- *2:  RCRs are in closed batch reactors (synthesis or formulation).
- *3: in the table Risk Characterization Ratios ("RCRs") were calculated using the most conservative DNELs and the methodology used for hazard assessment (and subsequently the risk characterization) of chemicals in water and soil is applicable. A worst-case, only long term systemic exposures were considered. Thus, the derived RCRs represent worst-case scenarios.
Methylhexahydrophthalic anhydride

### Exposure Scenario

#### Operating conditions

#### Risk Management Measures (RMM)

**PROC 1:** Use in closed process, no likelihood of exposure

**PROC 2:** Use in closed, continuous process with occasional controlled exposure

**PROC 3:** Use in closed batch process (synthesis or formulation)

**PROC 4:** Use in batch and other processes (syntheses) where opportunity for exposure arises

**PROC 5:** Mixing, kneading in batch processes for formulation of preparations and articles (multiple stages or significant contact)

**PROC 6:** Transfer of substance or preparation (drying/blocking)

**PROC 7:** Transfer of substance or preparation (drying/drying)

**PROC 8:** Transfer of substance (handling involving mechanical transport into small containers (bottling filling line, including weighing))

**PROC 9:** Transfer of substance or preparation into small containers (bottling filling line, including weighing)

**PROC 10:** Roller application

**PROC 11:** Treatment of articles by dipping and pouring

**PROC 12:** Roller application

#### Risk Characterisation Ratios (RCRs) (**2**)...
